To: ham-homebrew@ucsd.edu

Need info on sending digital message over RF broadcast of 3 mi radius or less.
Like to keep FCC restrictions to a minimum if possible. Message size 8bytes or
less. Terrain varies in area of use. need freq that handles obtstruction well.

Thanks in advance =:=)

Subject: HELP! Recomend signal processing book
To: ham-homebrew@ucsd.edu

Hello all:

I have recently been subjected to a torturous course in signal processing. This was in large part due to the miserable text book ("Analog & Digital Signal Processing", H. Baher, John Wiley & Sons, New York .) used for this course. The book is riddled with errors, omissions and misplaced references. Those of us who have used the book can not understand how it went to press.

I would really like to understand signal processing but need some help locating some books that are clear and practical, with the emphasis on practical. I would like to be able to build both analog and digital filters as well as write signal processing software. I need a book with lots of "complete" examples.

Thank You

Hi:

My friend Thomas is looking for a copy of Sept. 1993 73 Mag. He is interested in an article on a 40 meter loop antenna. Would anyone like to sell the issue or provide a copy of the article? He will send a SASE + copy costs or whatever. Thanks.

-Dean

I would like to find an assortment of tiny metric fasteners (screws, washers, nuts mainly) to replace worn/stripped/missing fasteners on equipment such as HTs and transceivers. I've seen assortments of metric fasteners before but only in larger sizes to be used with cars and so on. Any pointers? 73 Dave WB0GAZ
